

The \$AUD10,000 Monetary Challenge!

We are waiting for the politicians to announce that we have a great democracy so the people can now choose the highest monetary system for our nation, a system free from the historical chains of usury. Please tick one of the following two boxes.

System 1 – a privatised debt based monetary system where a \$1 loan at 6% annual compound interest, calculated daily, over 550 years creates a national debt of 214 trillion dollars. Please be aware that this monetary system is designed for the ignorant, the insane and the psychopathic as debt is the money for slaves. Please also be aware that this is our modern monetary system, even though it was designed centuries ago during times of serfdom, debt peonage, empire and war. It is also important to understand that the creation of the monetary supply as debts bearing compound interest is both usury and Satanism so the proponents of this monetary system, even though they may resist the terminology, are both usurers and Satanists!

System 2 – a nationally owned asset monetary system based upon the monetisation of the labours of the people to create an asset lake within the heart of the nation, a lake which can be released through the turbine of monetary policy to power our economy without using the four financial demons of debt, interest, taxation and inflation, with this asset lake protecting the people, private businesses and the nation from the crimes of usury. In this monetary model a \$1 loan at 0% annual compound interest, calculated daily, over 550 years creates a debt of only \$1. Asset money allows us to move from a debt based monetary system, existing at the level of a medieval oil lamp, to a monetary system operating at the level of hydro power and electricity, a dimensional shift enabling us to escape the darkness within the debt bankers prisons to discover freedom and an incandescence within the human psyche!

Money can now be defined as human life force traded within a marketplace, or more specifically 'I will go to the sea for a fish if you go to the hills for fruits and tonight we will feast.' The measure for money has become 'the distance that a typical human being, walking at the normal speed of 5km/hr, will cover within one hour, that is 5000 metres.' This monetary unit is a measure for human physiology, human psyche, time, distance and the speed of light as a metre is a measure of the speed of light within a vacuum. This is a monetary measure which can now be priced within the marketplace according to our skills, training and the use of technology, a measure which can create a natural marketplace as vibrant as the ant colonies which have used a similar 'monetary system' based upon ant-hours of labour for more than 120 million years! Have you ever seen an ant colony collapse through debt?

This monetary system is the economists' dream for a 100% reserve currency which operates using the minimal technological costs, those of debt, interest, taxation and inflation. This monetary unit also satisfies Aristotle's five attributes for authentic money, to be portable, durable, divisible, easily recognisable and intrinsically valuable. We can see with this monetary system that when we have life force to exchange, then we have money! We can now power our economy free from hunger and austerity, we can financialise all the realms of our economy which are presently unpaid, we can provide a universal basic income for the people within our nation!

We will give \$AUD10,000 to the first person who can convince the creator of this Challenge that a debt based monetary model for our nation is superior to an asset based monetary model. If you are unable to attain this prize then why are you accepting a debt based monetary system for your nation, why are you handing your national debts down through the generations in a dark financial game of debt peonage? Do you not understand that the violence in our outer world is inextricably connected to the violence which is enshrined within our debt based monetary system?

Where else in our modern society do we still use a major power source which has remained almost unchanged since the middle ages? Why do we use a monetary system which extracts the life force of our nation through a monetary unit based upon privately owned debts and compound interest, a monetary system which is a structure for financial vampirism?

When are we going to understand that a change within our financial system can transform our world from the satanic into the sacred? When are we going to awaken to our 'hidden splendour?'

Mackenzie King, Canadian Prime Minister 1935-1948.

'Once a nation parts with the control of its currency and credit, it matters not who makes the nation's laws. ... Until the control of the issue of currency and credit is restored to government and recognized as its most sacred responsibility, all talk of the sovereignty of parliament and of democracy is idle and futile.'
